brix:anura

CELUM Web-Portal

Key Features

- Web portal for direct access to assets from CELUM, no need for iframes
- Easy to install into any existing website
- Modular plugins can be freely combined
- Permissions can be set in the familiar **CELUM** dialog
- Download in several download formats
- Download basket with ZIP function
- easily adaptable design
- Flexible pagination or infinite scroll
- Choice of Lightbox to use
- Integration for videos
- Full text search, restrictable to a node
- Advanced search with information fields, keywords and asset properties
- Send E-mails with direct links to an asset or the content of a basket

Specifications

- Plugin for CELUM, requires 1 reader
- Custom, super efficient JSON interface
- jQuery standard in the front-end

Components

- anuraGallery classic image gallery with pagination and zoom function.
- anuraMasonry Vertically stacked content boxes (like Pinterest & Co).
- anuraCollage Full-width image wall to fit completely into a row.
- anuraTable Tabular display with details.
- anuraSlider Attractive image slider with many options and support for alternative texts.
- anuraBasket Collect assets for download and to send as a link via E-mail.
- anuraDetails details of an asset in a sidebar or as a popup.
- **anuraTree** Navigation component for displaying freely defined node structures.
- anuraSearch Detailed search for assets based on various characteristics.

Integration of an interactive image gallery in a single line of code

Present selected images and videos from CELUM Team or CELUM 5 directly in your web-, intranet- or brand portal. Simple, fast and effective.

brix:anura consists of a celum extension in the backend and a modular collection of jQuery-plugins that can be integrated into any existing website within a few seconds no iframes, no programming effort, no portal server.

Every plugin can handle node structures and is capable of displaying all available metadata languages. Check them out at http://anura.brix.ch
